

Easi-Grip® Long Reach Toe Nail Cutter

PTC-3

In response to customer feedback the handle of this scissor was redesigned to make it curvier and more comfortable, we then gave it a "soft feel lining" which guides finger positioning. The design was tested by a focus group who had swollen joints and all found it far more comfortable to use. Finally, we changed the colour to make it more attractive.

PTC-3	FEATURE	BENEFITS
1	Larger contoured handles with wider finger contact area	More comfortable, accomodates swollen joints and spreads pressure
2	"Soft-feel" finger contact area indicated by two tone finish	Guides finger position to use index finger for control and provides supreme comfort
3	Extended stainless steel shank	Reduces need for stretching and bending
4	Angled serrated blade	Prevents strain on wrist from twisting hand and grips nail whilst being cut

From a sitting position, the use of a foot stool and good lighting should make toe nail cutting easier.

RECOMMENDED FOR

Poor Hand Control

Difficulty Bending
