

OMNI Adaptive Drinking Aids – Cup & Mug

- Ergonomic handles allow single or double handed use
- Heat guard inside of handle
- Discreet hydration markings to monitor fluid intake
- Food standard, 100% BPA free premium melamine
- Dishwasher safe
- Excellent insulation for temperature stability
- Shatterproof - virtually unbreakable
- Perfect for anyone with assistive dining care needs
- Great for enabling continued independence

Made from durable melamine this assistive cup is lightweight, virtually unbreakable and cooler to the touch than a standard porcelain cup. Working perfectly with the Omni saucer, the easy placement aid provides a stable platform for both hot and cold drinks. Secondary grip point and sensory handle means this has all the functionality of a two handled cup or double grip beaker but with the style and dignity of a standard cup. The indent in the rim means a straw can rest securely and the dome means the straw will stay angled. Vibrant contrast colour handle assists with location recognition and aids those with visual impairments. Ideal for elderly or anyone with a grip difficulty. Encourages independence and dignity when drinking.
