

THE KEYWING

An award-winning key turner designed for those with arthritis or weak hands

This award winning design offers a simple solution to the problem of using Yale Keys which have a small surface area making them difficult to grip and turn. The Keywing clips over the key to provide a much wider finger contact area which improves grip and leverage when turning. Available in a range of 3 colours allowing the user to colour-code their keys and find the right one first time, every time.

HOW TO USE:

1. Pull clips to release tray
2. Peel off the film and stick your key to the pad
3. Reinsert the key and tray until it clicks into place

| FEATURE | BENEFIT |
|--------------------------|--|
| Increases size of key | Easier to grip and provides leverage for turning |
| Bright colours available | Easy to find |
| Tactile bumps | Stop fingers slipping |
| Made from Nylon | Warm to touch even in extreme cold |

RECOMMENDED FOR:

| | | | |
|-----------|-------------------|-------------------|--------|
| | | | |
| Weak Grip | Poor Hand Control | Visual Impairment | Tremor |
